Education

Ontario Tech University — Oshawa, ON
Bachelor of Science (Co-Op), Computer Science — *Sep. 2022 – June 2027*

Experience

Data Strategy & Analytics Intern — Jan. 2026 – Aug. 2026
Scotiabank — *Toronto, ON*

- Developed data ingestion and transformation workflows using **Python**, SQL, and **Google Cloud Platform** to process, validate, and analyze large operational datasets
- Designed interactive **Power BI dashboards** and executive-level views that visualized key performance indicators, operational trends, and actionable business insights
- Integrated with the **Genesys API** to retrieve contact-centre data, troubleshoot authentication and data-quality issues, and support new analytics capabilities for the team
- Automated recurring data-processing and reporting tasks through Python scripting, improving workflow consistency and reducing manual analysis
- Collaborated with managers and cross-functional stakeholders to gather requirements, resolve technical blockers, and apply **data governance** and development best practices

Google Developer Group Technical Director — Feb. 2025 – Dec. 2025
Ontario Tech University — *Oshawa, ON*

- Hosted workshops teaching **React**, Firebase, and full-stack development, engaging **50+ students**
- Mentored students via hands-on projects and semester roadmap planning resulting in better project outcomes
- Organized and led AI, resume-building, and portfolio workshops alongside tech events, strengthening professional readiness and technical literacy for participants

Project Manager Intern — Apr. 2024 – Dec. 2024
Kochasoft Inc. — *Toronto, ON*

- Directed large-scale server transition plans across WebSphere, VMware, Windows, and **AWS** environments, improving infrastructure stability and **reducing downtime by 25%**
- Managed sprints through **Azure DevOps** and Jira Kanban boards, increasing team delivery efficiency and task visibility across cross-functional teams
- Presented executive-level project updates supported by detailed flowcharts, wireframes, and use-case documentation, streamlining stakeholder communication
- Partnered with developers and system architects to align deliverables with client requirements, ensuring **100% compliance** with SOW timelines and quality standards

Part-Time Legal Administrative Assistant — Sep. 2020 – June 2022
Sanka Law Professional Corporation — *Scarborough, ON*

- Maintained and organized legal case files, processed client accounts, and ensured compliance documentation met provincial standards
- Utilized MS Office tools to draft legal documents, track case timelines, and prepare correspondence for attorneys and clients
- Coordinated client communications and appointment scheduling, improving administrative response time and overall office efficiency by **20%**

Projects

Aurora - Mental Health & Wellness Mobile App | *Flutter, Dart, Firebase* — Oct. 2025 – Present

- Designed and developed a cross-platform mental health wellness app using Flutter and Dart, focusing on self-care tracking, journaling, and emotional reflection
- Integrated Firebase for authentication, cloud storage, and Firestore database management, enabling real-time data syncing across devices
- Implemented push notifications for daily mood check-ins, habit reminders, and mindfulness prompts to encourage consistent engagement

- Built AI-assisted features using natural language tools to provide personalized wellness insights and coping strategies based on user inputs.

MindMetrics-ML: Quality of Life Prediction | *Python, PyTorch, pandas* Nov. 2025 – Dec. 2025

- Developed an end-to-end regression pipeline to predict quality-of-life outcomes from behavioral, lifestyle, mental-health, and device-usage data
- Preprocessed and standardized data using pandas and scikit-learn, then trained a PyTorch multilayer perceptron with ReLU activation, dropout, Adam optimization, and validation-based checkpointing
- Deployed the trained model through an interactive Streamlit application that generates real-time predictions from user-provided lifestyle and behavioral inputs

Technical Skills

Languages: Python, SQL, Java, JavaScript, C++, C, Go, Dart
Frameworks & Libraries: PyTorch, scikit-learn, pandas, NumPy, Matplotlib, React, Flutter, Streamlit
Data & Cloud Technologies: Power BI, Google Cloud Platform, BigQuery, Firebase, Genesys Cloud API, REST APIs
Developer Tools: Git, Jira, Maven, VS Code, Visual Studio
